

**Office of the Illinois State Treasurer**  
**Alexi Giannoulas**  
**Request for Proposals – *Cash Dash* Web Site Enhancement**

**June 27, 2008**

Responses to Questions Pertaining to the RFP

- (II-C)- *Provide the ability to create and post graphs and charts*: Is the website required to provide an output of data so that the Treasurer may create graphs & charts, or should the website include a function which itself can generate graphs, charts, and run reports? Can the Treasurer provide an example of the type of graph or chart to be created and the data to be included (are these management reports of website statistics, or detailed reports such as claim status)? **The website should include a function that can generate graphs and charts and run reports. At a minimum, we should be able to obtain reports providing statistics about website traffic and be able to obtain reports about claims generated and claims status (or the site should integrate with Wagers in such a way that these reports can be obtained via the Wagers system).**
- Is there scoring assigned or certain components such as cost that carry a greater weight than others? **Cost and ability to perform the required services will carry the heaviest weights.**
- Please provide a list of potential bidders who attended the Bidders' Conference.
  - **Applexus – Mr. Rahman Shafeequr**
  - **Fzzz! Media LLC – Mr. David M. Burrows**
  - **ACS Unclaimed Property Clearing House – Mr. Joseph Scorzoni**
- For the scope of this project, can we assume that the accessibility requirements are limited to items 1.1-18.1 in the section “Web-Based Information & Applications”? (From the Illinois Web Accessibility Standards) **Yes, that is correct.**
- In order to be consistent with other Illinois websites, we will be using the cascading style sheets (CSS) for developing the website. Are we correct in assuming that the CSS files provided to us by the state are compliant with the accessibility standards? **No, we do not currently have a standard CSS file. It will be up to the vendor to ensure that their CSS complies with the Illinois Web Accessibility Standards.**
